Currently door will not stay on cabinet.		
	Subtotal	\$2,571.00
	Taxes	\$0.00
	Total	\$2,571.00

Make Payment

Invoice Notes:

5 ton 20 Seer Trane inverter system. System working great, and duct system appeared good. Recommend installing new supply to addition in rear of home. We can tap into supply trunk and run an independent run to new room. Add gas line to fuel fire place.

Recommendations while I was inspecting the system, would be to install a new Media filter cabinet and return plenum. The door had fallen off the Media cabinet and luckily the filter caught most of the crawl space dust. I removed the media filter and immediately noticed the system blowing better. I didn't have a filter at the time so I taped/put the door on to keep the system sealed from any crawl space air or dust. Unit will be fine without a filter for a week or two but will need one back in. I looked at the blower housing and it did not appear to be covered in crawl space dust. However, I would recommend replacing the return plenum because it did get some dust inside (see pics) and how the internal insulation is made in the plenum you cant clean it out.

Replaced return plenum and media filter. Ran new 8 inch supply to new addition room.
